

Untuk menginstall Laravel, siapkan Laragon dengan versi 6 php 8.1 ke atas

1. Buka Laragon kemudian Start All

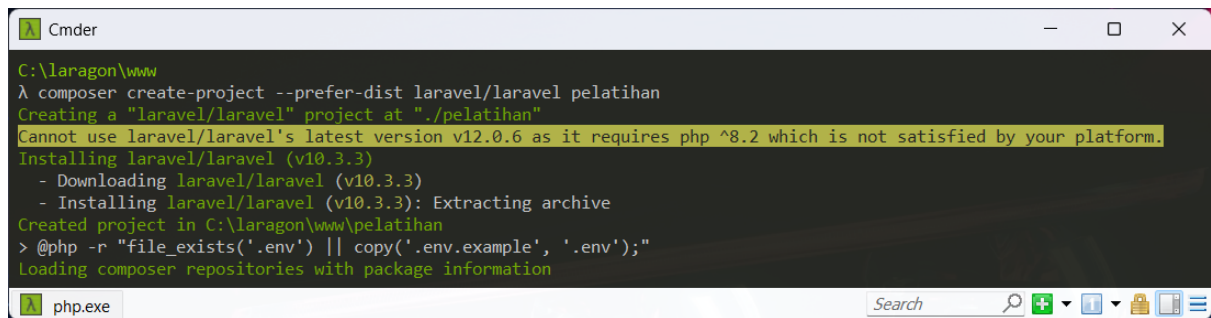

2. Kemudian Buka Terminal

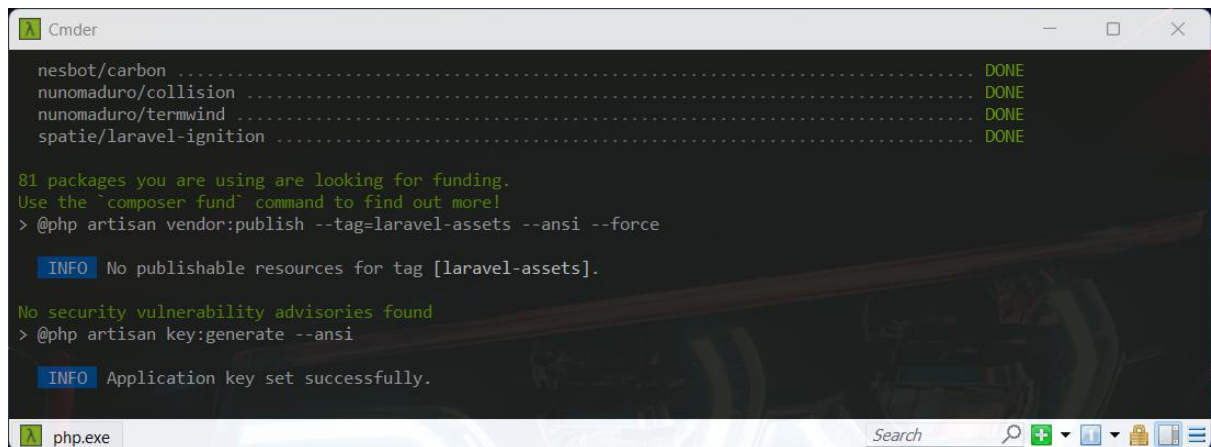

\*cek terlebih dahulu versi php dan composer nya, input kan sesuai yang ada di atas

3. Jika sudah cek semua versi input kan sesuai yang dibawah  
*Composer create-project --prefer-dist laravel/laravel pelatihan*

```
C:\laragon\www
λ composer create-project --prefer-dist laravel/laravel pelatihan
Creating a "laravel/laravel" project at "../pelatihan"
Cannot use laravel/laravel's latest version v12.0.6 as it requires php ^8.2 which is not satisfied by your platform.
Installing laravel/laravel (v10.3.3)
- Downloading laravel/laravel (v10.3.3)
- Installing laravel/laravel (v10.3.3): Extracting archive
Created project in C:\laragon\www\pelatihan
> @php -r "file_exists('.env') || copy('.env.example', '.env');"
Loading composer repositories with package information
```

\*tunggu untuk penginstallan, jika selesai menginstall, maka tampilan akan seperti dibawah ini

```
nesbot/carbon ..... DONE
nunomaduro/collision ..... DONE
nunomaduro/termwind ..... DONE
spatie/laravel-ignition ..... DONE

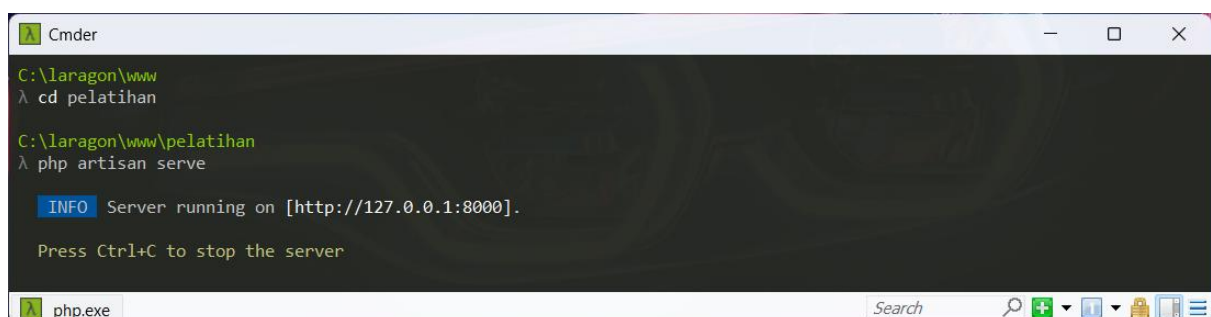

81 packages you are using are looking for funding.
Use the `composer fund` command to find out more!
> @php artisan vendor:publish --tag=laravel-assets --ansi --force

[INFO] No publishable resources for tag [laravel-assets].

No security vulnerability advisories found
> @php artisan key:generate --ansi

[INFO] Application key set successfully.
```

4. Kemudian tambahkan path pelatihan dengan cara input  
*cd pelatihan* di terminal, kemudian jalankan servernya dengan menginput *php artisan serve*

```
C:\laragon\www
λ cd pelatihan

C:\laragon\www\pelatihan
λ php artisan serve

[INFO] Server running on [http://127.0.0.1:8000].

Press Ctrl+C to stop the server
```

\*jika sudah keluar seperti gambar di atas, copy "http://127.0.0.1:8000". Dan paste di web browser
